## PERSONAL PROJECTS

### Portfolio- Website (07/2023 - 07/2023)

- Its my Portfolio website ,designed and development a Website with using HTML,CSS and JavaScript.
- This project serves as a digital resume, offering a captivating and comprehensive representation of the individual's professional Skills And Education.
- <https://github.com/GautamSonig/Portfolio.git>

### Amazon Clone (07/2023 - 07/2023)

- Designed and development a Website with HTML,CSS and little bit bootstrap.
- The Amazon Clone Website is a fully functional e-commerce platform built using HTML and CSS.The HTML code defines the structure of the webpage, including the header, search bar, navigation menu hero section, shop section, and footer. The CSS code contains styles to customize the appearance of various elements on the webpage
- <https://github.com/GautamSonig/Amazon-homepage-clone.git>

### Office Empolyee Managemant System (06/2023 - 06/2023)

- Designed and development a Website withBackend using Python, Django and for frontend using HTML and CSS
- The Employee Management System is an easy project for beginners to learn how to build a web-based Python Django project.An Employee Management System in Django keeps track of all of the employee's information and data. We've created all of the employee and company crud (create, read, update, and delete) operations.
